

Singapore P1 registration demand: 15 consistently coveted schools (2019–2025)

Scope and metric

This report covers Nanyang Primary, Rulang Primary, Nan Hua Primary and 12 comparable schools. The comparison cohort is not an academic ranking: every included school required Phase 2C balloting in all seven covered exercises (2019–2025), giving a defensible measure of sustained demand.

Cell format: `vacancies/applicants` (`applicants ÷ vacancies`) ; `ballot` means applicants exceeded vacancies. The ratio is a phase-level demand indicator, not a child's personal admission probability, because actual priority depends on citizenship and home–school distance categories.

Important comparability break in 2022

MOE combined Phase 2A(1) and Phase 2A(2) into a single Phase 2A from the 2022 exercise, while doubling the Phase 2C reserve from 20 to 40 places. Therefore, merged Phase 2A is compared only for 2022–2025. For 2019–2021, this report preserves 2A(1) and 2A(2) separately rather than manufacturing a misleading combined subscription rate.

2025 pressure snapshot

School	Phase 2A	Phase 2B	Phase 2C
Nan Hua Primary School	61/102 (1.67×) ballot	21/40 (1.90×) ballot	41/166 (4.05×) ballot
Rosyth School	76/110 (1.45×) ballot	20/31 (1.55×) ballot	42/132 (3.14×) ballot
Rulang Primary School	71/102 (1.44×) ballot	20/30 (1.50×) ballot	40/98 (2.45×) ballot
Red Swastika School	95/110 (1.16×) ballot	20/42 (2.10×) ballot	41/93 (2.27×) ballot
Pei Hwa Presbyterian Primary School	53/120 (2.26×) ballot	20/51 (2.55×) ballot	41/84 (2.05×) ballot
Ai Tong School	109/134 (1.23×) ballot	20/62 (3.10×) ballot	43/81 (1.88×) ballot
Catholic High School (Primary Section)	94/141 (1.50×) ballot	20/35 (1.75×) ballot	40/72 (1.80×) ballot
Tao Nan School	122/156 (1.28×) ballot	20/63 (3.15×) ballot	45/81 (1.80×) ballot
Methodist Girls' School (Primary)	95/88 (0.93×)	22/54 (2.45×) ballot	45/78 (1.73×) ballot
CHIJ St. Nicholas Girls' School (Primary Section)	86/117 (1.36×) ballot	20/48 (2.40×) ballot	41/71 (1.73×) ballot
Anglo-Chinese School (Junior)	134/104 (0.78×)	30/61 (2.03×) ballot	61/95 (1.56×) ballot
Nanyang Primary School	144/177 (1.23×) ballot	20/53 (2.65×) ballot	42/63 (1.50×) ballot
Henry Park Primary School	131/99 (0.76×)	31/31 (1.00×)	63/93 (1.48×) ballot
Anglo-Chinese School (Primary)	120/81 (0.68×)	33/61 (1.85×) ballot	66/96 (1.45×) ballot
Raffles Girls' Primary School	150/64 (0.43×)	49/31 (0.63×)	115/143 (1.24×) ballot

Top 2025 subscription rates by phase

- **Phase 2A:** Pei Hwa Presbyterian Primary School 2.26×; Nan Hua Primary School 1.67×; Catholic High School (Primary Section) 1.50×; Rosyth School 1.45×; Rulang Primary School 1.44×.
- **Phase 2B:** Tao Nan School 3.15×; Ai Tong School 3.10×; Nanyang Primary School 2.65×; Pei Hwa Presbyterian Primary School 2.55×; Methodist Girls' School (Primary) 2.45×.
- **Phase 2C:** Nan Hua Primary School 4.05×; Rosyth School 3.14×; Rulang Primary School 2.45×; Red Swastika School 2.27×; Pei Hwa Presbyterian Primary School 2.05×.

Long-run findings

- **Phase 2C is the universal bottleneck in this cohort:** all 15 schools balloted in 2C in every year from 2019 to 2025.
- **Nan Hua and Rosyth carried the heaviest sustained 2C pressure:** their seven-year average subscription rates were 4.91× and 3.70× respectively.
- **Phase 2B pressure is often sharper than 2C at brand-name schools with larger 2C allocations:** in 2025 Tao Nan (3.15×), Ai Tong (3.10×), Nanyang (2.65×), Pei Hwa (2.55×) and MGS (2.45×) led this cohort in 2B.
- **Merged Phase 2A pressure is highly uneven:** Pei Hwa, Nan Hua, Catholic High, Rosyth, Rulang, CHIJ St Nicholas and Nanyang balloted in every merged-2A year covered or nearly every year, while ACS (Junior), ACS (Primary) and RGPS did not ballot in merged 2A during 2022–2025.
- **The post-2022 rule change generally reduced the apparent 2C ratios by increasing the reserved seats, but did not eliminate ballots at the consistently demanded schools.**

Subscription-rate visualisations

The heatmaps below make phase pressure easier to compare while retaining the exact applicants ÷ vacancies ratio in every cell. Values above 1.00× indicate oversubscription, not a child's personal ballot probability.

Phase 2A subscription rates by school and exercise year

Legacy 2A(1) and 2A(2) are shown separately for 2019–2021; merged Phase 2A begins in 2022. Do not compare across these regimes as one continuous series.

	Legacy Phase 2A(1)			Legacy Phase 2A(2)			Merged Phase 2A

- SGSchoolKaki 2019–2025 school archive: <https://sgschoolkaki.com/p1-registration/ballot-history> (its school pages label 2024–2025 as MOE official and 2019–2023 as a third-party archive of MOE-origin records).

Validation performed

The 45 selected-school values for 2025 (15 schools × 3 phases) were programmatically cross-checked against MOE's official page: **45/45 matched, with zero value mismatches**. Earlier 2019–2023 values remain archival rather than independently revalidated against a live MOE endpoint, so they should be treated as high-utility historical reference data, not as an official MOE publication hosted today.

Prepared 23 August 2026; phase heatmaps and per-school Phase 2C trend charts added 25 August 2026. Subscription rate = applicants ÷ vacancies. Exercise year is one year before P1 entry year.
